Stable turning

The HGK_Series has two synchronously operating drive units that are used for ensure continuous rotation with stepless speed control. The Roller spacing can be increased and decreased manually by means of socket pins in order to achieve a large diameter range of the workpieces.

Properties:

- For turning and positioning
- in the field of machine, container, plant and pipeline construction
- Two synchronously running drive motors
- Adjustable rotation speed.
- PU rollers
- The adjustment takes place via bolts
- Remote control

Scope of delivery:

- 1x control
