The "KEMPER mobile cartridge filter" is designed for the extraction of pollutants that arise during the various electric welding processes. In principle, the device can be used in all work processes in which particulate pollutants, i.e. smoke and dust, are released. However, you should make sure that no "rain of sparks" (e.g. from a grinding process) is sucked into the filter device.

Furnishing :

- Mobile welding fume extraction or mobile cartridge filter
- Suction without suction hose
- User manual + wiring diagram (PDF)
